

PROTECTION YOU CAN COUNT ON

LYDUS NITRILE MEDICAL EXAMINATION GLOVES

- ✓ ASTM D6319 certification
- ✓ US FDA 510(k): K203191 (LZA)
- ✓ ISO 10993 biological evaluation certification
- ✓ EN455 and EN374 standards certification
- ✓ ISO9001 quality system certification
- ✓ ISO13485 quality system certification
- ✓ The EU CE certification

ASTM D6319 provide an effective barrier against various hazardous materials, viruses and bacteria as part of 510K certification by the Food and Drug Administration (FDA).

Lydus Medical Examination Gloves are tested for multiple uses including basic **exam room checks**, **hospital use**, **food handling** and **barrier protection** from viruses and bacteria. Textured finger tips enable sharp tactile sensitivity and excellent gripping for everyday use.

WHY DO BUSINESS WITH US?

We began as a simple manufacturer of segmented tires in 1989. Today, with over 1,000 employees, we are ranked among the **top 10 U.S. providers of PPE** and one of the largest custom rubber compounders in North America.

Airboss is publicly traded (TSX: BOS) and we produce a wide array of protective products, systems and solutions for government and private organizations operating within the medical sector, automotive, heavy commercial, infrastructure, oil & gas, military and defense,

Immediately following the outbreak of the Covid-19 pandemic, U.S. National PPE supplies ran critically low. ADG responded by successfully delivering over **15 million boxes of nitrile medical examination gloves**, 150,000 powered air-purifying respirator (PAPR) systems, more than 3.6 million PAPR filters, and other PPE products to customers in critical sectors of government and industry.

PPE products remain in continuous demand by many private organizations and agencies within local and federal government.

Through strategic partnerships, ADG has developed a network of capable and proven supply partners with industrial purchasing power that vastly reduces both delivery time and cost for our end customers.

We have expanded our product portfolio to include inventories on ground in the U.S. of nitrile examination gloves, medical gowns, respirators, filters and other protective gear.

I look forwards to discussing how ADG can provide efficient solutions for your company.

Sincerely,

Andrew Rogers

Chief Strategy & Growth Officer
Airboss Defense Group

PROUD TO BE TRUSTED BY

DHS Department of Homeland Security
HSS Department of Health & Human Services
TSA Transportation Security Administration
VA Veterans Administration
